information processing apparatus; and wherein said grouping means organizes said delivered contents into groups by the established grouping attribute.

Reasons of Allowance

5. **Claims 1-14, 16 and 17** are allowed.

6. The following is an examiner's statement of reasons for allowance:

Independent Claim 1 identifies the distinct features, "*generating means for generating user preference information indicating preferences of a user based on the use frequency calculated by the calculating means, the generating means generating the user preference information based on a normalized use frequency for each group, the normalized use frequency normalized by dividing each use frequency of each content in each respective group by a number of all the contents in the respective group delivered during a time period corresponding to a use history; and recommending means for giving content recommendations based on the user preference information generated by the generating means*", which are not taught or suggested by the prior art of records.

Independent Claim 13 identifies the distinct features, "*generating user preference information indicating preferences of a user based on the use frequency calculated in the calculating, the generating including generating the user preference information based on a normalized use frequency for each group, the normalized use frequency normalized by dividing each use frequency of each content in each*

Art Unit: 2185

respective group by a number of all the contents in the respective group delivered during a time period corresponding to a use history; and giving content recommendations based on the user preference information generated in the generating", which are not taught or suggested by the prior art of records.

Independent Claim 14 identifies the distinct features, *"generating user preference information indicating preferences of a user based on the use frequency calculated in the calculating, the generating including generating the user preference information based on a normalized use frequency for each group, the normalized use frequency normalized by dividing each use frequency of each content in each respective group by a number of all the contents in the respective group delivered during a time period corresponding to a use history; and giving content recommendations based on the user preference information generated in the generating", which are not taught or suggested by the prior art of records.*

Independent Claim 17 identifies the distinct features, *"a preference generating unit configured to generate user preference information indicating preferences of a user based on the use frequency calculated by the calculating unit, the preference generating unit configured to generate the user preference information based on a normalized use frequency for each group, the normalized use frequency normalized by dividing each use frequency of each content in each respective group by a number of all the contents in the respective group delivered during a time period corresponding to a use history; and a recommending unit configured to give content recommendations*

Art Unit: 2185

based on the user preference information generated by the preference generating unit",
which are not taught or suggested by the prior art of records.

Claims 1-14, 16 and 17 would be allowable over the prior art of records because the claimed features as mentioned above in combination with other claimed features are not taught or suggested by the prior art of records. The above features in conjunction with all other limitations of the dependent and independent claims 1-14, 16 and 17 are hereby allowed.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
